although your intentions maybe good willed

the one thing psoriasis sufferers dislike the most is the use of the word cure

[View Gallery](#)

there is NO CURE there is a remission and the likes but there is NO CURE

im sure i speak for all members ( for those i dont sorry )

what your brother has experined is a remission in his psoriasis due to the routine he has encountered which would then be best left up to the individual to take up on if he or she feels like doing

Portugal 2009

but i stress again there is NO CURE

Think you have said it for all of us on here Darren.....there is no cure for psoriasis,

remission YES but no cure.

Sue

First I am glad you have found something that works for you

Several points I would like to make here.

- 1 Cured is an emotive word and one that needs backing up with some facts and has to be taken with the knowledge that remission can and does happen for long periods of time.
- 2 What works for some will not necessarily work for others, there is a variation in response to various methods. Diet based remedies do not work for me, I have found them useless, but then my trigger was emotional stress as a child. Personally the regime I use works for me and the P bothers me only a little nowdays but I will not belittle others for not using the same regime or demand they use it. Don't you realise we have heard all about the Pango diet already? Soe have had sucess with but far from all.
- If it is that simple don't you think we would ditch the meds etc at the drop of a hat?
- 3 P has been around for thousands of years and therefore alleged toxins in modern diets are not the cause. Your zero chemicals claim is a nonsense as everything is made up of chemicals of one sort or another wether man made or found in nature.
- 4 Incurable, by our present medical knowledge this is true, in the future as P and it's causes are better understood a cure may be found.
- 5 If you feel you have a cure then get it tested to clinical trial standard and then we might belive it is an actual cure.

As a P sufferer for over 40 yrs I have had period of remission longer than the 3 yrs or so you claim to be cured for so don't bank on it being a cure rather than remission, only time will tell and quite a long time, decades for instance. 😊

Your approach does put people off as you are telling us what to do despite our collective experience which is that while somethings work well for some ( like Barney's Formula) they do not work for all and dont think we haven't heard of diet related methods before because there are many pages here. Your arrogance in assuming you have a cure, unproven in scientific terms and untested in clinical terms, will not encourage us to take much notice of you. If you were to present your findings in an unbiased and factual way pointing out your successes backed up by evidence without claiming a cure you will have more success with us.

Quote

And this is the ideology I battled against in skin cell forum when I used to be sick. When I was sick, they welcomed me with open arms.

Oh... welcome sick brethren.  
 I poured my heart and soul and made my journal there.  
 Then when I found out how to cure myself and cure others as well they HATED ME  
 FOR IT.  
 They erased my thread.

Hmm, so skin cell removed your threads?

As I say the way you present your ideas and the way you talk down to us is not good  
 and likely to offend, could be Skin Cell felt the same 😞

I have had psoriasis for over 30 years.

Daz is right there is no cure ... Only remission . which I am in at the moment and  
 would never ever contemplate calling it cured.

Sorry goodsamaritan 55. but on here you are not likely to be believed.  
 We are not fools.

Let me give you an example of my day TODAY:

- I wake up in the morning before 6am. Nice sleep.
- I get a teaspoon of plain virgin coconut oil and do oil pulling for 20 minutes.
- This is my non-toxic substitute for toothbrushing. I do not injure my gums with plastic  
 bristles and I do not pollute my oral cavity with TOOTHPASTE - read the ingredients,  
 a mess of chemicals with poison FLOURIDE usually. And most people poison  
 themselves with flouride toothpaste 2x a day.
- Breakfast time with my kids.
- Native / organic / high vitamin C GUAVAS
- 1 RAW fertilized organic DUCK EGG (good fats)
- a few minutes later - daily POOP REFLEX - effortless
- Drink a cool tall glass of FRESHLY OPENED RAW Coconut juice with coconut meat  
 (good fats)
- I take a shower - NO SHAMPOO - NO SOAP
- I dress up - clothes washed with ORGANIC WASH SOAP
- I use NO DEODORANT - I merely dab some calamansi juice under my ampits  
 (something like lemons)

- My driver picks me up, I go to work, my office is 500 meters from my house.
- Lunch time. I call my cook to prepare my food. I go home.
- I eat 1/4 kilo of fresh RAW TUNA SASHIMI - ocean fish, wild fish
- I also eat 1/4 kilo of fresh RAW FATTY BEEF HEART - organic, pasture fed
- Wow, that made me full.
- Wait a few minutes and I drink some fresh RAW COCONUT JUICE.
  
- I go back to the office. Work some more, drive around for errands, pay wages, buy a new computer chair.
  
- I get thirsty, I go home for a snack and I cut 2 slices of fresh RAW organic WATERMELON.
- I POOP AGAIN effortlessly.
  
- I do computer work at home.
- I'm back at the office and finalize a new website for launch. New bike magazine website.
- I'm having a relaxing conversation with you via this forum.
  
- This evening I will go home and not eat dinner. I'm still full.
- I will probably eat some more RAW watermelon, refreshing. Yummy.
  
- Then I'm off to bed before 10pm.
- I do not watch TV. I do not own a TV.

-----  
Zero chemicals.  
All organic.  
All Raw Paleolithic / Caveman diet.  
Done effortlessly.  
Not a cold, not a cough, not a hint of fever in this lifestyle.  
-----

Of course it took me a long time to establish a clean lifestyle, to unlearn what the greedy marketers of "normal 21st century living" brainwash people with in the Mass Media.

There are a couple hundred people who live the same lifestyle I do with their own variations. And they are robust healthy.

In fact my Raw Paleo Diet teacher is BRITISH: Geoff Purcell - he lives in London.

Geoff and I and a couple of hundred people get together for socials on the internet. But I'm not posting any website links because that might be interpreted as marketing.

Best wishes and hope you find the time to read my cure protocol.

So some 21st century stuff is OK?? Cars? Internet?

Each to there own, and good luck with with your way of life.

But I think personally I'd sooner suffer the P than be bored stiff with that lifestyle

So much more exciting you would rather suffer psoriasis?

So what does your exciting life consist of?

Here is what Google cache saved on my thread in skin cell.

It truly bothered the moderators there and the top moderator shouted to the top of his lungs in the boldest largest CAPS on the forum that THERE IS NO CURE... etc. etc. etc.

The cool headed other moderator said I was confusing the members. More likely... a couple of them were being inspired.

This file attachment shows my history, that I'm the genuine article. Not made up for marketing cr\*p to people.

I learned quite a lot about the truth about health after this and moved on to help HEAL people with various ailments for almost dead with psoriasis to cancers to kidney diseases to simple acid reflux, etc.

I read many cure books, self experimented, enrolled with online internet teachers. Now I'm the family healer and the extended family depends on my advice, because it usually works.

I also socialize with fellow healers, some of them hobbyists, some of them professional healers, we help one another with patients to help HEAL people with the incurables.

Who knows, maybe a couple of interested Psoriasis sufferers in this forum will be interested in my teachings for MULTI-YEAR REMISSIONS. So far, only one has shown interest.

reread what you have quoted, diet based remedies do not work for me they have no effect so pointless you trying to persuade me to engage in a discussion of my diet. It is none of your business 😞

Again your arrogance in assuming you can "help" is founded on the fallacy that diet based regimes work for all and your assumption that we have not heard of the Pango regime before. We have and some members have had success with but far from all.

I am telling you our collective experiences show that not to be true.

What we do not need is someone telling us what we should do.

We are capable of reading the evidence of all the regimes here and making our own minds up.

So get off your soapbox and stop preaching that diet based regimes are the only way. They are not.

TBH you are showing your own ignorance, P affects the whole person and its causes are not restricted to the skin, diet or digestive system.

The interaction of mind, mental state, blood chemistry and how the immune system learns its reactions to infections and stress are important issues too.

On the whole you have made your point re your experiences of a diet based routine and I should restrict myself to that rather than trying to make out you can help every single one of the 10,000 plus members of PHO and discount the equally valid regimes others have found useful.

Don't think we have not experienced individuals who think they have the cure, mostly we have had to ban them because they lack the tolerance to understand that they don't have a cure and that we have a different point of view to them.

Sounds like a good idea in this case. This person is condescending and irritating but I guess that's only to be expected from someone who calls himself goodsamaritan 😏 😏

On the other hand, I'm quite convinced that this is not a sales pitch - it's too awful to be successful 😏 😏

**Maybe then I should talk about my brother who was diagnosed with PSORIASIS by multitudes of doctors when he was 12?**

At 26 he almost died of his ever progressing psoriasis that in its climax engulfed his whole body.

[View Gallery](#)

He found the courage to call me to rescue him in his apartment.  
 He was almost dead, weak to the core, psoriasis ravaged from head to toe, every square inch of his body.  
 His whole apartment stinked, a terrible stink, of maybe a decaying corpse?  
 My cousin who fetched him wanted to hold prayer vigils because my brother was almost dead.  
 I sternly said to my cousin that my brother will not die.  
 And I will make dam sure to cure him.

Which of course my brother is now on full remission of all symptoms. He got married last February. Last month we found out his wife was pregnant. Absolutely great. I will just tell the story of what we did to my brother. Hopefully it will inspire some people in this forum.

My brother was a walking SCAB.  
 Really thick skin.  
 Years of PUVA, steroids, drugs of all sorts, and tons of daily petroleum jelly --- all conspired to do even more damage --- my brother stuck to his doctors until he almost died.

These pictures in his extremities? same on his whole body, even his face.

I will tell his healing adventure in the next replies.
